

PRIYANKA KADAM

Data Analyst |Data Visualization

7900110750 | priyankakadam2314@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with a strong foundation in data cleaning, analysis, and visualization. Hands-on experience through academic projects using Excel, SQL, Python, Tableau, and Power BI. Proficient in MS Excel including Pivot Tables, data cleaning, and basic analysis. Skilled in transforming raw data into meaningful insights to support business decision-making, with strong problem-solving and communication skills.

EDUCATION

Mumbai University (2022-2025)

BSc Information Technology | CGPA: 9.17

Maharashtra State Board (2022)

HSC| 63.50%

Maharashtra State Board (2020)

SSC| 86.20%

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Tools:** MS Excel (Data Cleaning, Pivot Tables, Basic Analysis), VS Code, Power BI, Tableau
- **Concepts:** Data Cleaning, EDA, Data Visualization
- **Other Tools:** PowerPoint, MS word
- **Soft Skills:** Problem-Solving, Communication, Team Collaboration

PROJECTS

Railway Ticket Booking Database System | MySQL

- Designed relational database with 10+ tables for ticket booking system.
- Implemented foreign keys to maintain relationships between users, tickets, routes, and payments.
- Used SQL queries (JOIN, GROUP BY, COUNT) to analyze booking and feedback data.
- Automated ticket expiration using MySQL Event Scheduler.

Customer Churn Analysis Dashboard | Power BI

- Cleaned and transformed data using Power Query.
- Built DAX measures to track active, inactive, and churned customers.
- Designed interactive dashboards using slicers for region, gender, and credit score analysis.
- Identified key churn patterns (~20% customer attrition) and key risk segments

Superstore Sales Analysis – Tableau

- Analyzed sales and profit data using Tableau.
- Created visualizations like state-wise profit, product category performance and sales vs profit trends.
- Gained insights about business performance and profitable regions.

Employee Analytics (EDA Project) | Python (Ongoing)

- Performed exploratory data analysis on employee dataset to identify attrition trends.
- Analyzed factors like Gender, Department, Salary, and Years of Experience affecting employee turnover.
- Used Pandas, Matplotlib, Seaborn for data cleaning and visualization.
- Generated visual reports to help understand workforce behavior and decision-making.

CERTIFICATION

Data Analytics – Quastech Institute, Vashi | 2025–2026
